E_{NHANCED}

N_{URSE}

N_{AVIGATION}

Who can take part in this study?

You may be eligible to participate in the TENNSM Trial if:

- You have been diagnosed with breast cancer or began adjuvant treatment within the last 3 months
- You are within the income guidelines*

What would happen if I took part in the study?

- You will be given a minicomputer and trained on how to use it
- You will be given free access to the internet for one year
- You will be given information through the computer about breast cancer and its treatment
- You will be followed for a year and will answer questions about how you feel
- You can keep the minicomputer after completing the study

For more information or to refer patients, please call

(410) 332- 4945 or (410)951-7950
